Architecture Design Syllabus

2017-2018

Instructor	**Email**	**Office Location & Hours**
Mr. Reed	breed@conroeisd.net	D207-Floater Check website Bennyreed.weebly.com

General Information

This course is designed for students to learn about the design of buildings, building layouts, structural and visual components, design processes, CAD software packages, career opportunities in architecture and construction, and more. Students will use books and technology to solve architectural design problems and create projects. Students will leave this course with knowledge that will help them proceed in post-secondary architectural design programs, various design careers, and many different construction careers. Students will gain a much greater appreciation and understanding of the buildings around them and the design elements involved.

Course Materials

No course material needed for this course. I will have a class set of books but also can be downloaded from my website.

Optional Materials

Each student gets a free Autodesk account where you can download the Revit program. Sorry mac computers will not let you download the program right now.

Required Text

Architecture Residential Drafting and Design, Clois E. Kicklighter, W. Scott Thomas
